

Positive Behaviour for Learning at John Palmer Public School

At John Palmer Public School we regard good discipline among students as an important part of providing a safe, respectful and productive learning environment for all. John Palmer Public School, through PBL, aims to maintain appropriate behaviours through the systematic teaching of behavioural expectations. Our PBL program is based on a school-wide set of expectations which apply across the school in every circumstance and setting in which students are learning. From these expectations, a set of rules has been developed for each school setting. These rules define our expectations for behaviour in our school and are taught explicitly throughout the year.
